SUMMARY

I am a diploma student in Computer Engineering from **Government Polytechnic Pune** with an interest in full-stack web, mobile, and IoT projects. As a **fresher**, I am seeking an internship opportunity where I can apply my knowledge, improve my skills, and learn emerging technologies. With good **communication** and **teamwork** abilities, I am eager to contribute to projects, enhance usability, and take on new challenges.

EDUCATION

Diploma In Computer Engineering

Government Polytechnic Pune • Pune, India • 2026

- Completed multiple **full-stack** projects including **Smart MedCare** and **Privacy Over Media**
- Gained expertise in React, Next.js, Node.js, and IoT with ESP32
- Participated in **workshops** and **practical labs** for hardware and software integration.

Higher Secondary Education (HSC)

Rajarshi Shahu Mahavidyalaya Latur • Latur, India. • 2022

- Gained strong foundation in **core sciences**: Physics, Chemistry, and Biology
- Participated in **academic events** and **group study** activities
- Built **discipline** and **analytical problem-solving** approach.

SKILLS

Frontend: React, Next.js, JavaScript, Tailwind CSS

IoT/Embedded: ESP32, Arduino, Sensors Integration, Raspberry-Pi

Backend&Database: Node.js, Flask, Firebase, Supabase

Tools: Git, GitHub, Vercel, EmailJS, MongoDB, AWS, Figma, Google Colab, Excel

Other: HTML, CSS, C, C++, Data Structures, Python, Java, SQL

PROJECT

Smart MedCare

GPP

- IoT Health Monitoring system tracking vitals (BP, heart-rate, SpO2) and hormones, with real-time alerts and **rural-friendly** design.
- Designed a **real-time IoT dashboard** for controlling devices remotely.
- Integrated multiple **sensors** with live **data sync**.

Portfolio Website

GPP

- Designed and built a full-stack personal portfolio website using **React**, **TailwindCSS**, and **Framer Motion** for interactive UI.
- Implemented contact form with **EmailJS**, downloadable **resume**, and mobile-first responsive design.

Privacy Over Media

GPP

- An intelligent **privacy-preserving** system that hides sensitive user data over social media platforms using genetic algorithms.
- Engineered a privacy-focused solution leveraging **genetic algorithms** to obscure sensitive personal information across social media platforms, strengthening **data protection** and user trust.

Smart Radar System

GPP

- Radar-like IoT system for detecting objects in real-time using **sensors** and **ESP32**, visualized with live feedback.
 - Engineered a smart radar system utilizing IoT sensors and ESP32 to detect objects in real time, enabling live data **visualization** and rapid situational awareness for enhanced monitoring capabilities.
-

EXPERIENCE

Student

Government Polytechnic Pune(Major Project)

July 2025 - Present, Pune, India

- Developed an **IoT health monitoring system** for vitals and hormone tracking, targeting rural and urban healthcare needs.
- Implemented real-time data acquisition using **ESP32** and **biomedical sensors**.
- Designed and developed a mobile app UI for live monitoring.
- Conducted usability testing to ensure reliability and accuracy.
- **Technologies:** React Native, ESP32, Sensors, Node.js, Firebase.

Student

Infosys Springboard

September 2024 - September 2024, Pune, India

- Built a mini toy car that stops and changes direction when obstacles are detected.
- Completed multiple **IoT and embedded systems** courses from Springboard curriculum.
- Gained practical knowledge of **sensors, microcontrollers, and real-time decision-making**.

COURSEWORK

Python 3.4.3

Python • 2025 • Python

- The training program was completed through self-learning using Spoken Tutorials and by passing an online test.
- The score achieved was **82.50%**.

Financial Literacy Course for Bharat

Financial Literacy • 2025 • Teamwork

- Teamwork was applied by actively collaborating with peers during group exercises and discussions, where we shared diverse perspectives, divided tasks effectively, and cross-checked **financial** concepts.
- This collective approach improved understanding, problem-solving, and presentation of insights.

Internet of Things 101

Internet of Things 101 • 2025 • Arduino-Sensors

- Arduino-Sensors skills were applied by working on **practical** IoT setups, where sensors were connected to Arduino boards to capture real-time data such as temperature and motion.
- This data was processed and transmitted for analysis, helping me understand the fundamentals of IoT **applications** and device-to-cloud communication.

CERTIFICATIONS

TechnoFEA 2.0

BRACT's Vishwakarma Institute of Information Technology (VIIT), Pune • 2025

- It certifies that I have, as part of Team Arjuna, participated in "**TechnoFEA 2.0**" an event organized by BRACT's Vishwakarma Institute of Information Technology (VIIT), Pune.

Student Training Programme

Government Polytechnic, Pune. • 2025

- It certifies that I have participated in a Student Training Programme on Python **3.4.3**.
 - This training was organized by Government Polytechnic, Pune, from February 8, 2025, to March 28, 2025, using course material provided by the Spoken Tutorial Project, IIT Bombay.
-
